

A man in a dark jacket and trousers stands in a modern hallway, looking at a wall-mounted crashrail. The hallway has a patterned carpet and recessed lighting. The walls are covered in Kingpin crashrails, which are illuminated from within. The ceiling is dark with recessed lights. The overall atmosphere is sleek and modern.

# PROTECT YOUR WALLS

High durability crashrails for hotels, hospitals, airports and public environments.

Standard Kingpin are made from surface-treated raw steel with milled aluminum end caps.

It's also available in a wide range of different finishes, such as plated copper, plated brass, chrome or brushed stainless steel.

With its hidden LED lights, Kingpin can be programmed to create both functionality and ambiance lighting.

Emergency lighting is smartly built into Kingpin, which facilitates areas with evacuation requirements.

Quick and easy to mount and with its maintenance-free surface it keeps the style forever and your walls free from damages.

Kingpin are produced "made to measure" and delivered complete with lightfixtures and drivers.
